Bizana, Eastern Cape

## Summary

Graduand of BCom Information Systems student at the University of Fort Hare with hands-on experience in C#, SQL, and ASP.NET. Skilled in software development, systems design, and problem-solving. Currently seeking on-site or remote opportunities to apply and grow my technical and analytical skills in a professional IT environment.

---

## Experience

### National Senior Certificate

Nongeke SSS • Bizana, EC

01/2019 - 01/2026

Completed high school in the Science Stream, developing strong analytical and problem-solving skills. This academic path laid the foundation for my interest in technology and systems, which I continue to build on through my university studies in Information Systems.

### System Design and Implementation Tutor

University of Fort hare • East London, South Africa

08/2025 - 10/2025

As a Systems Design and Implementation Tutor, I was responsible for guiding students through core concepts of systems analysis, design, and implementation by reinforcing lecture material during tutorials. I supported learners in developing system models, translating designs into functional solutions, and applying best practices in documentation, testing, and problem-solving, while providing academic support and constructive feedback to enhance their understanding and performance.
